

# July 2024: Election Videos Go Viral

Legislators are inundated with reports from frustrated constituents after videos go viral showing what appears to be multiple instances across the state with security weaknesses that voting equipment was stolen.

Many election officials are unaware of the extent of the problem.

What could we have done?

What can we do now?

# October 2024: Campaign Breach Used to Target Voters

Campaigns are large targets because of valuable voter data. They use it to

A breach in a campaign server results in gaining situational awareness on voters to target with disinformation.

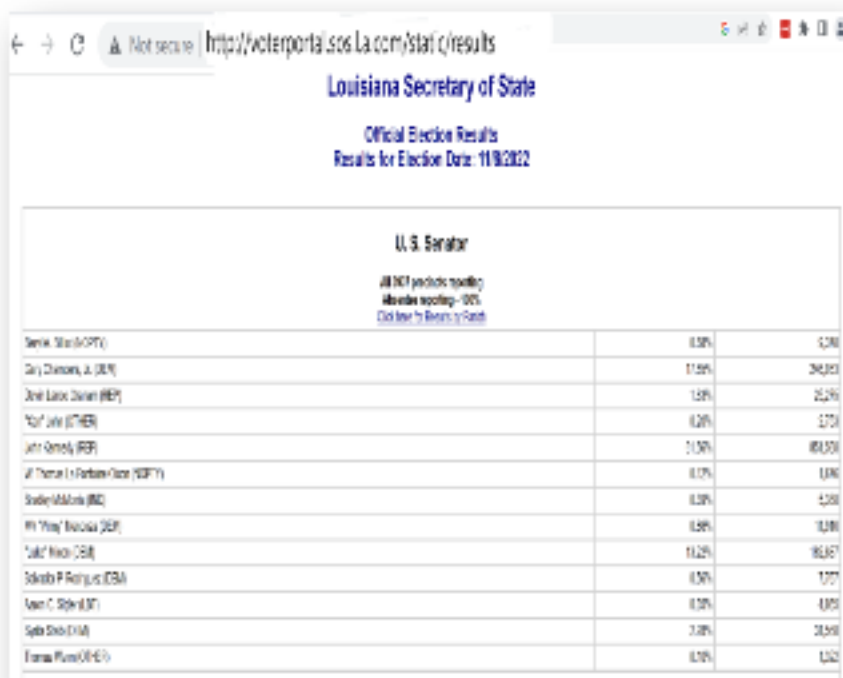

Data obtained in the breach is used to target specific demographics with disinformation to change their mind on specific issues or to ensure they do not turn out to vote.

# November 7, 2024:

## Courthouses and Counting Facilities Under a Microscope

Two days after Election Day, camp supporters to go and observe post at courthouses and counting facilities transparency and faster counting.

Many observers come in good faith process but the complexity of the differences between what they see are hearing on the news about our concern. They demand clarity.
