

Consent-Based Siting Updates

Natalia Saraeva

Senior Advisor (detail appointment)

Office of Spent Fuel and Waste Disposition

Office of Nuclear Energy

U.S. Department of Energy

Integrated Waste Management

- As we continue to deploy nuclear energy as a solution for decarbonization, increasing access to energy, and tackling climate change, we need to make progress on the back end of the fuel cycle
- The Department of Energy is responsible for managing the nation's spent nuclear fuel and high-level radioactive waste, including finding sites to store and dispose of the spent nuclear fuel
- While spent nuclear fuel is stored safely all over the country, the communities that have the spent nuclear fuel never agreed to host the material long term

Interim Storage

- Allow for removal of spent nuclear fuel from reactor sites
- Provide useful research opportunities
- Build trust and confidence
- Begin to address taxpayer liability

Consent-Based Siting

- Consent-based siting is an approach to siting facilities that focuses on the needs and concerns of people and communities.
- By prioritizing communities and people, we believe we can find a solution to the decades-long stalemate on managing the nation's spent nuclear.
- A consent-based approach, driven by community well-being and community needs, is both the right thing to do and our best chance for success.

Notice of Request for Information (RFI) on Using a Consent-Based Siting Process To Identify Federal Interim Storage Facilities

A Notice by the [Energy Department](#) on 12/01/2021

PUBLISHED DOCUMENT

AGENCY:

Office of Spent Fuel and Waste Disposition, Office of Nuclear Energy,
Department of Energy.

ACTION:

Request for information.

SUMMARY:

The Office of Nuclear Energy (NE), U.S. Department of Energy (DOE), requests information on how to site Federal facilities for the temporary, consolidated storage of spent nuclear fuel using a consent-based approach. DOE anticipates that communities; governments at the local, State, and Tribal levels; members of

Request for Information

Request for Information

- Questions on:
 - the consent-based siting process itself
 - removing barriers to meaningful participation—especially for groups and communities who have not historically been well-represented in these conversation
 - interim storage as a component of the nation’s waste management system
- Special focus on ensuring issues of equity and environmental justice are built into the consent-based siting process, as well as the waste management system as a whole

Next Steps

1

Analyzing responses to RFI

2

Further developing consent-based siting process

3

Clarifying our broader strategy for an integrated waste management system

4

Issuing a funding opportunity for interested groups and communities later this year
