

Khan Academy®
Official *Praxis*®
Core Prep

Believing that anyone who wants to be a teacher can reach that goal.

The *Praxis*® Core Academic Skills for Educators (*Praxis* Core) program is taking a new approach to test preparation. By collaborating with Khan Academy, we are making available a free, online prep resource that focuses on building the content skills teacher candidates need to succeed in the educator preparation and licensure process.

This skills prep tool is not about “cracking the exam.” It’s about building — and rebuilding — the core academic skills needed for the exam and beyond. The *Praxis* Core tests reflect the fundamental literacy and numeracy skills that teacher educators have identified as necessary to the success of all teacher

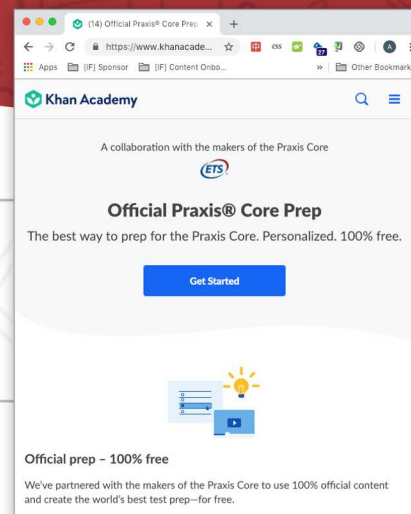

candidates, no matter what subject or grade level they aspire to teach. This test prep resource builds upon Khan Academy’s proven instructional model and content to help all candidates attain and hone these skills.

How do teacher candidates experience Khan Academy Official *Praxis* Core Prep?

Khan Academy Official *Praxis* Core Prep helps teacher candidates build the reading, writing and mathematics skills they need to succeed on the *Praxis* Core exam. With this resource, candidates can identify their strengths and weaknesses, as well as remediate their skill gaps. They can also create study plans to fit their busy schedules. This resource is completely free for anyone.

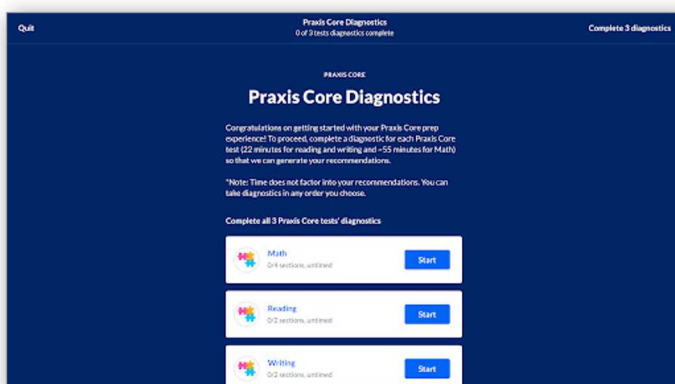

1

Teacher candidates can begin their experience by setting up a free account at [khanacademy.org](https://www.khanacademy.org).

2

Candidates will then be prompted to take diagnostic tests for reading, writing and math. These tests enable Khan Academy to recommend a personalized study plan that helps candidates reach their score goals.

3

Once the diagnostic tests are complete, candidates are prompted to create a customized practice schedule that includes full-length practice tests and interactive sample questions.

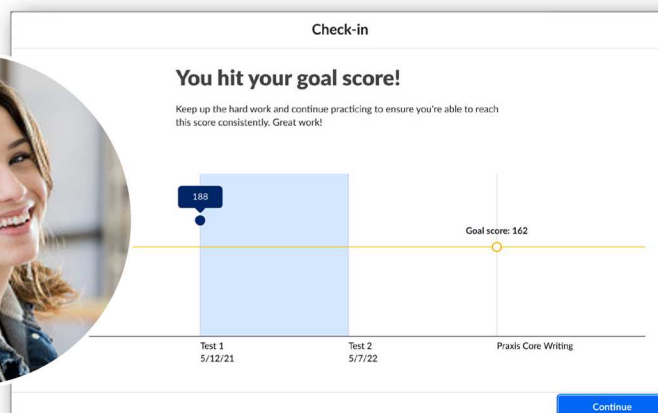

Candidates practice their skills in reading, writing and math based on Khan Academy's recommendations and will receive immediate feedback on the practice problems when they click on the "Check" button. Additionally, if they get a problem wrong, they can choose to see the answer explanation and related examples.

4

5

As candidates move through their personalized plan, Khan Academy will provide practice problems to strengthen each skill required in the practice test.

6

Finally, the candidates are able to keep track of their practice test scores against their goal scores, celebrate their successes along the way and build their confidence for test day!

Together, ETS and Khan Academy hope to:

- Widen the path into preparation programs for all students interested in teaching and help to diversify the teacher pipeline
- Reduce the need for test remediation and test repetition by providing preparatory instruction
- Maximize the success of those who enter preparation programs

About Khan Academy

Khan Academy is a 501(c)(3) nonprofit organization with the mission of providing a free, world-class education for anyone, anywhere. Khan Academy's free resources include practice questions, quizzes, videos and articles. They offer preschool through early college learning on a range of academic subjects, including math, sciences and the humanities. They have been translated into 36 languages and 18 million people learn on Khan Academy every month. www.khanacademy.org

About ETS

ETS draws upon its seven decades of expertise as a nonprofit educational assessment and research organization to pioneer innovative ways for people to show what they know and can do. The belief in the life-changing power of learning is at the root of everything they do — it's behind the tools they develop for teachers, the research that inspires educational progress and the commitment ETS makes to enable opportunity for learners around the world. www.ets.org
