

Welcome!

Hooray – we are so happy you are here IN-PERSON!

Thank you!

About NCSL

Strengthening the legislative institution

How NCSL Strengthens Legislatures

NCSL provides trusted, nonpartisan policy research and analysis

Connections

NCSL links legislators and staff with each other and with experts

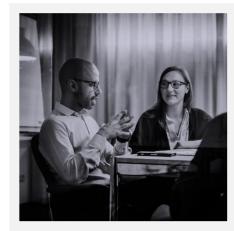

Training

NCSL delivers training tailored specifically for legislators and staff

State Voice in D.C.

NCSL represents and advocates on behalf of states on Capitol Hill

Meetings

NCSL meetings facilitate information exchange and policy discussions

State Health Policy Issues

Health care access and coverage

Medicaid

Health costs, including prescription drugs

Public health, including maternal and child health

Behavioral health

Educational seminars, policy collaboratives, Fellows

Policy Analysis

Legislative tracking and databases

Technical Assistance

Research requests, instate testimony

Policy Tools

Reports, magazine articles, podcasts, web resources

Topics for today

- Introductions
- The Future of Public Health
- Welcome and Discussion with CDC Leadership

Topics for tomorrow and Thursday

- Public Health Governance and Workforce
- Vaccine Policy
- Infectious Disease
- Suicide Prevention
- Folders
- Ground rules

Agenda

Tuesday, June 21

Build knowledge about new research and policy

Exchange ideas and solutions

Meet and learn from other legislative leaders

Connect with leading researchers and policy experts

Identify practical information to use in your state

Have fun!

Let's Hear From You!

- Name
- Chamber
- State
- In 5 words or less, what public health issue have you worked on most?
- A fun fact about you!

Please keep your responses to 1 minute in length.

Current State & Key Discussion Question

- Significant interest in public health "modernization" and "transformation" in light of COVID
- Multiple efforts at the state and national level to "rebuild" public health
- State and Territorial Health Official engagement is limited due to COVID response
- New funding specific to COVID may or may not be used to build capacity but is generating significant interest in broad capacity building
- Build Back Better legislation had a significant investment in public health infrastructure (5 years, \$7 billion; other provisions)
- \$3 billion for workforce development expected soon (5 years)
- New Public Health Infrastructure Fund Authorized and Appropriated (FY2022, \$200m)

April 7, 2021 | Discussion Paper

About the NAM series on Emerging Stronger After COVID-19: Priorities for Health System Transformation

This discussion paper is part of the National Academy of Medicine's Emerging Stronger After COVID-19: Priorities for Health System Transformation initiative, which commissioned papers from experts on how 9 key sectors of the health, health care, and biomedical science fields responded to and can be transformed in the wake of the COVID-19 pandemic. The views presented in this discussion paper and others in the series are those of the authors and do not represent formal consensus positions of the NAM, the National Academies of Sciences, Engineering, and Medicine, or the authors' organizations.

The future of the public's health

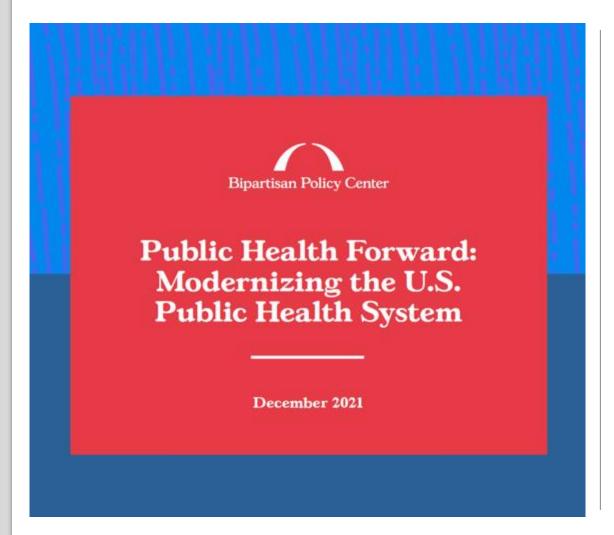

Reimagining the health ecosystem: Programs, policies, and systems for strengthening public health

The following are the most commonly cited priority areas for change or improvements needed to build the public health system of the future:

- DATA INFRASTRUCTURE AND SYSTEMS
- 2. WORKFORCE DEVELOPMENT, RECRUITMENT, AND RETENTION
- 3. FUNDING
- 4 PUBLIC HEALTH POLICY AND LAW
- 5 MULTISECTOR SYSTEM PARTNERSHIPS
- 6. HEALTH DEPARTMENT CAPACITY TO ADVANCE QUALITY IMPROVEMENT
- 7 BUILDING PUBLIC TRUST IN PUBLIC HEALTH

- Advances in health equity continue to be made because public health
 departments partner with various sectors (e.g., housing, food, transportation),
 stakeholders (e.g., businesses, faith-based organizations, community-based
 organizations (CBOs), health care), and community members, and also
 engage in Tribal consultation, toward the shared goal of providing a fair and
 just opportunity for all to achieve good health and well-being.
- Sufficient, predictable, and flexible public health funding supports the
 public health system to sustain healthy communities. States, territories,
 and localities act quickly to protect the public from expected and unexpected
 health issues. This means that all public health departments have the
 necessary resources to support nationally agreed-upon core programs and
 cross-cutting skills and to meet national public health practice standards.
- A robust, modern, interoperable, and secure public health information system delivers real-time, accurate, and actionable data to help public health officials detect new or growing threats, identify groups that may be at risk, and respond quickly with tailored policy, practice, and program interventions. Public health departments also translate and share data with policymakers and other stakeholders in a timely manner.
- Modernized laws, policies, and statutes protect and promote the public's health in a manner that reflects ongoing threats and challenges, enables public health officials to make decisions without political influence, and ensures public health responsibilities remain intact and protected.
- A highly skilled, trained, and diverse public health workforce provides
 evidence-informed programs and services that address community health
 needs, encourage healthy behaviors, and act swiftly to respond to emerging
 threats. Staff feel valued and incentives exist to pursue long careers in
 governmental public health.

3 Topics in all 4 Reports

Data Infrastructure/Systems

Modern, interoperable, secure, real-time, accurate, actionable

Shared data across sectors in real time

Modernizing data and IT capabilities

Workforce Development, Recruitment, and Retention

A resilient, robust, and multidisciplinary public health workforce

A highly skilled, trained, and diverse public health workforce

Investing in leadership and workforce development

Funding

Sufficient, predictable, and flexible public health funding

Funding incentives aligned with prevention, health promotion, and wellness

Transforming public health funding

Top Topics in 3 reports

Modernized laws, policies, statutes

Public health policy and law
Affirming the mandate for public health

Multisector partnerships

Ecosystem partners working toward a unified goal

Supporting partnerships and community engagements

Other topics included

Advances in health equity

A future centered around equity

Building Public Trust in Public Health

Ecosystem partners working toward a common goal

Promoting alignment across the public health sector

	PH Forward	Future of PH (Deloitte)	PH COVID Impact Assessment	The Future of PH (NNPHI)
Funding*	Sufficient, predictable, and flexible funding	Funding and incentives aligned with prevention, health promotion, and wellness	Transforming public health funding	Funding
Data systems improvement*	Robust modern, interoperable, secure, realtime, accurate, actionable	Shared data across sectors in real time	Modernizing data and IT capabilities	Data infrastructure and systems
Workforce*	A highly skilled, trained, and diverse workforce	A resilient, robust, and multidisciplinary workforce	Investing in leadership and workforce development	Workforce development, recruitment, and retention
Public Health Law & Authority*	Modernized laws, policies, and statutes		Affirming the mandate for public health	Public health policy and law
Partnerships		Ecosystem partners working toward a unified goal	Supporting partnerships and community engagement.	Multisector system partnerships
Equity*	Advances in Equity	A future centered around equity		
System Alignment & Shared Value		A shared value proposition	Promoting structural alignment across the public health sector	
Quality Improvement				Capacity to advance quality improvement
Build Public Trust				Building trust in public health

^{* =} ASTHO 2022-2024 Strategic Priority Area

- What *must* a governmental public health agency do and at what level?
- What *should* a governmental public health agency do and at what level?
- What resources are needed to do this?
- How <u>much will that cost</u> and who is going to pay for that?
- What legislative actions will advance the above?
