

Dragon Ambient Experience

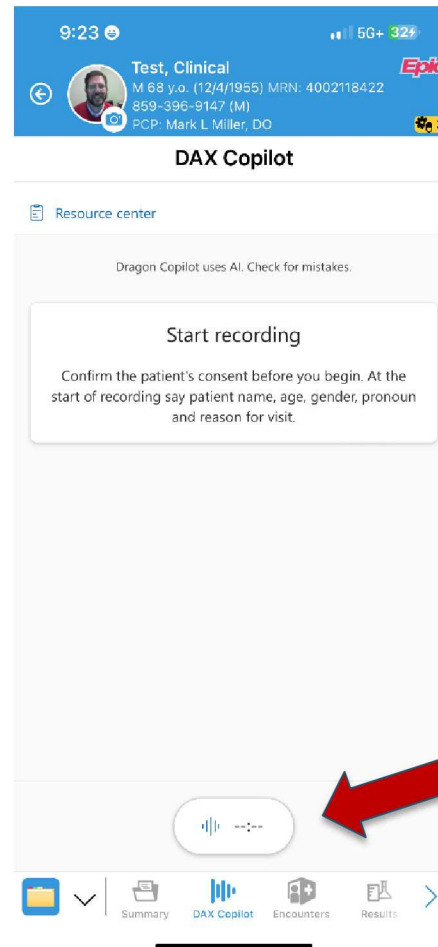

CMIO-Dr. Sunita Kasliwal

July 2024

U^{OF}L Physicians

DAX

Utilizing the Haiku app on their smartphone, providers utilize ambient listening to record patient encounters that are transcribed into the note

Providers simply press record when starting the patient visit

Providers can easily view the status of the voice recorded note on their schedule

Time	Checked In	Note Status	Room/Location	Patient
4:30 PM		Ready	SEMC PC 101	Test, Clinical 68 y.o. / M
5:00 PM			SEMC PC 101	Test, Clinical 68 y.o. / M

12:00 PM	11:36 AM	Reviewed	SEMC PC 101	Test, Clinical 68 y.o. / M
12:30 PM	11:37 AM	Reviewed	SEMC PC 101	Test, Clinical 68 y.o. / M

DAX Note output

History of Present Illness |||

The patient is being seen today for follow-up on hypertension, hyperlipidemia, COPD, and diabetes. He has been taking his medications as prescribed.

Regarding his diabetes, he checks his blood sugars twice a day and finds they run between 140 and 150. He has been compliant with his Jardiance and his insulin and he has had no episodes of hypoglycemia.

Regarding his hyperlipidemia, he has not been taking his atorvastatin as it caused him muscle cramps and wonders if he could be changed to something different. His last lipid

Physical Exam |||

The patient is alert, in no apparent distress.

Pupils are equal, round, reactive to light.

Clear airways, clear to auscultation. No wheezes.

Regular rate and rhythm.

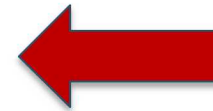

Assessment & Plan |||

1. Hypertension.

We are going to continue his current dose of amlodipine and I have sent a 90-day supply to his Express Scripts pharmacy.

2. Diabetes.

His A1c is elevated today at 8.9. I am going to increase his Jardiance and that has been sent to his mail order pharmacy. I will also order laboratory studies today. I will check lipid panel and we will also do a metabolic panel to evaluate his kidney function. In addition, we will order a microalbumin. I did review his health maintenance topics. He is due for influenza vaccine, so that will be ordered and administered today.

DAX generates the history, physical and assessment/plan based on ambient listening to the patient encounter.

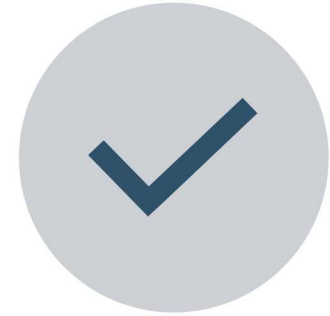

DAX Benefits

ALLOWS THE PROVIDER TO SPEND MORE TIME FACE TO FACE WITH THE PATIENT AND LESS TIME LOOKING AT THE COMPUTER SCREEN

RELIEVES THE MENTAL FATIGUE RELATED TO CHARTING AFTER HOURS

ABILITY TO GET NOTES SIGNED BEFORE LEAVING THE OFFICE
