Task Force on Artificial Intelligence, Cybersecurity and Privacy

AT&T Forum | 601 New Jersey Ave. NW, Washington, DC | September 28-29, 2023

Agenda

| Co-Chairs | Senate President Thomas Alexander, South Carolina  
| Assemblymember Jacqui Irwin, California |
| NCSL Staff | Heather Morton, Denver  
| Susan Frederick, Washington D.C. |

Thursday, Sept. 28

6-7:30 p.m.  
Royal Sonesta Capitol Hill Sapphire Room  
Task Force Reception

Friday, Sept. 29

8-8:30 a.m.  
AT&T Forum  
601 New Jersey Avenue, NW  
Breakfast

8:30-8:45 a.m.  
Welcome and Introductions  
• Senate President Thomas Alexander, South Carolina  
• Assemblymember Jacqui Irwin, California

8:45-10 a.m.  
Intersection of Privacy and AI – Safeguarding Data in the Age of Intelligence  
Learn about the relationship between AI and privacy protections. We will delve into this critical nexus to give you a deeper understanding of the challenges and opportunities of these issues and empower you with the knowledge to craft sound policy while respecting privacy.  
Speakers:  
• Cherie Givens, chief privacy officer, North Carolina Department of Information Technology  
• Jennie Hoelscher, privacy officer & assistant general counsel, Texas Department of Information Resources

10-10:30 a.m.  
Snapshot: Demystifying AI—Microsoft  
Learn about ways in which Microsoft has implemented powerful AI tools and their philosophy on addressing ethics issues, considerations for policymakers when considering legislation, and ideas for harmonizing AI with constituent concerns.  
Speakers:  
• Danyelle Solomon, director, Justice Reform & Racial Equity Policy, Microsoft

10:30-10:40 a.m.

| 10:40 a.m.-11:30 | Cybersecurity State Plan Update                                             | Learn how states have allocated federal and state funding to develop sound strategies to address cybersecurity risks and safeguards.                                                                         | Doug Robinson, executive director, NASCIO  
Alex Whitaker, director of government affairs, NASCIO                                         |
| 11:30-Noon   | Snapshot: Google                                                             | TBD                                                                                                                                                                                                     |                                                                                            |
| Noon-1:15 p.m.| Lunch and State Short Takes                                                  | While you eat your lunch, hear from our members on recently enacted privacy and AI legislation.                                                                                                           | Sean McSpaden, principal legislative IT analyst, Oregon Legislative Fiscal Office           |
| 1:15-1:30 p.m.| Break                                                                        |                                                                                                                                                                                                         |                                                                                            |
| 1:30-2:30 p.m.| Zero Trust and Multi-Factor Authentication: Building Robust Cybersecurity Defenses | Learn how states can use zero trust and MFA to identify potential vulnerabilities and implement effective countermeasures to thwart cyberattacks.                                                          | Okta  
Senate President Pro Tempore Wayne Harper, Utah  
Assemblymember Jacqui Irwin, California                                                        |
| 2:30-2:45 p.m.| Break                                                                        |                                                                                                                                                                                                         |                                                                                            |
| 2:45-3:15 p.m.| Snapshot: BSA – The Software Alliance                                       | Learn more about the BSA AI framework that addresses bias risk management that can be used to perform impact assessments to identify and mitigate risks of bias that may emerge throughout an AI system’s lifecycle. | Kate Goodloe, managing director, BSA – The Software Alliance                                |
| 3:15-4 p.m.  | AI Impacts: Addressing Health                                                | Learn about the transformative potential of AI and the challenges it presents in the health sector.                                                                                                          | Dr. Brian Anderson, chief digital health physician, Mitre  
Kathleen Featheringham, vice president of artificial intelligence/machine learning, Maximus |
