ARTIFICIAL INTELLIGENCE
AI is dreaming up drugs that no one has ever seen. Now we've got to see if they work.
AI automation throughout the drug development pipeline is opening up the possibility of faster, cheaper pharmaceuticals.
By Will Douglas Heaven February 15, 2023

TECHNOLOGY EXECUTIVE COUNCIL
Less burnout for doctors, better clinical trials, among the benefits of AI in health care

In a first, FDA authorizes AI-driven test to predict sepsis in hospitals
By Daniel Gilbert and Rachel Roubein
Updated April 3, 2024 at 5:31 p.m. EDT | Published April 3, 2024 at 12:02 p.m. EDT

67% of Americans support greater regulation of emerging AI technologies to ensure safe and effective use.

Applications of Artificial Intelligence in the Health Care Sector

Promising Applications:

- The FDA has [approved AI-assisted tools](#) to help detect cancers of the brain, breast, lung, prostate, skin and thyroid.
- Generative AI developed [six potential novel antibiotics](#) for resistant bacterial strains.
- An AI tool, [Predictive Optimal Trees in Emergency Surgery Risk](#) (POTTER), can accurately predict 30-day outcomes in patients undergoing emergency general surgery.

2023 & 2024 State Legislation

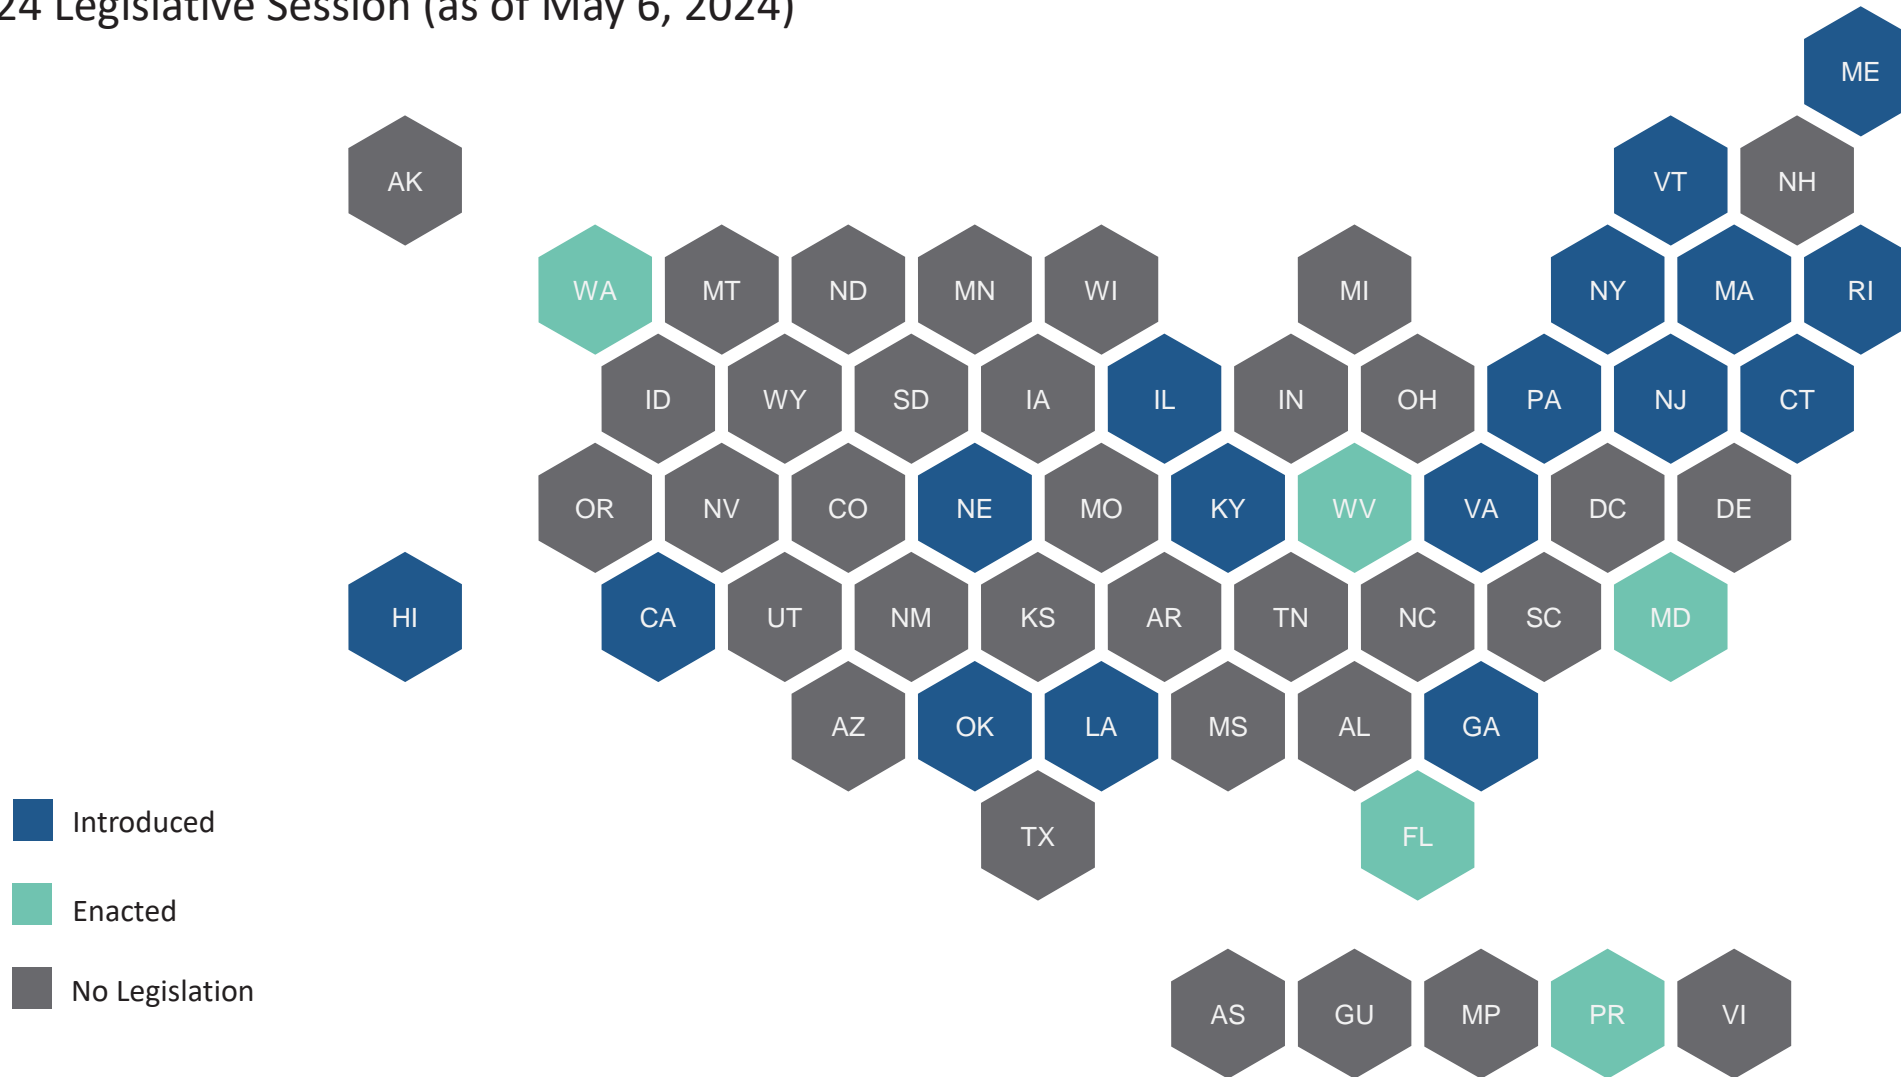

Health Artificial Intelligence Legislation

2023 Legislative Session

Health Artificial Intelligence Legislation

2024 Legislative Session (as of May 6, 2024)

Legislative Themes

Who Does The Policy Regulate?

Developers

Deployers

- Health Plans
- Clinical Users (Health Facilities, Providers, etc.)

Legislative Themes

Study Committees or Task Forces

Responsible Use

Patient Notification

Practitioner Monitoring or Validation

Developing Standards for Developers and/or Deployers

State Legislative Examples

State Legislative Examples

Study Committees or Task Forces

Florida ([SB 7018](#))

Enacted: Creates the Health Care Innovation Council to discuss innovations in technology, workforce and service delivery models that can be exhibited as best practices, implemented or scaled to improve the quality and delivery of health care.

Washington ([SB 5838](#))

Enacted: Establishes a task force to assess current uses and trends and make recommendations to the legislature regarding guidelines and legislation for the use of AI systems.

State Legislative Examples

Responsible Use

New York (SB 7543)

Pending: Requires an impact assessment for any automated decision-making system being utilized by a state agency. The assessment must test for accuracy, fairness, bias and discrimination.

Oklahoma (HB 3577)

Pending: Requires insurers to submit artificial intelligence-based algorithms and training data sets that are being used in the utilization review process to the Department of Transparency.

State Legislative Examples

Patient Notification

Massachusetts (HB 1974)

Pending: Requires that providers who wish to deliver mental health services using AI seek approval from the relevant professional licensing board and obtain informed consent from the patient.

Pennsylvania (HB 1663)

Pending: Provides for health insurer disclosure of the use of AI-based algorithms in the utilization review process to any health care provider, covered person and the general public.

State Legislative Examples

Practitioner Monitoring or Validation

Georgia ([HB 887](#))

Pending: Requires any coverage determination decision from the use of AI shall be “meaningfully reviewed” by an individual who has the authority to override said AI.

Louisiana ([HB 916](#))

Pending: States that a health care entity shall not make any decision regarding the care of patients based solely on the results derived from AI. The provider shall have the authority to override any decision.

State Legislative Examples

Creating Standards for Developers and/or Deployers

Illinois (HB 1002)

Pending: Requires hospitals using any diagnostic algorithm to first confirm that it has been certified by the Department of Public Health and Department of Innovation & Technology.

Virginia (HB 747)

Pending: Creates standards for developers of high-risk AI systems. Developers must disclose certain information to each deployer.
